SIXTH FORM MATHEMATICS AND ICT SCHOLARSHIP

Explanatory notes

As a specialist Mathematics and Computing school St Marylebone offers Mathematics and Computing Scholarships to Sixth Form students. We are looking for people who are passionate about mathematics or Computing, have a high level of aptitude and a proven commitment to their subject above and beyond the current requirements of any courses they are currently studying. If that describes you and you are intending to study both Mathematics and Further Mathematics at AS level, or AS Computer Science then you should apply.

Successful candidates benefit from a scholarship package which will include:

- Mathematics and Further Mathematics literature bursary (Mathematics Scholars)
- Position of Mathematics or Computing Ambassador for the school
- A range of workshops, competitions, speakers, trips and master classes
- Higher Education Mentoring Programme and individualised UCAS application support

If you are talented in either Mathematics or Computing and are applying for one of the following, then you are eligible to apply:

- Mathematics AS **and** Further Mathematics AS
- Computer Science AS

Internal candidates should note that if you already hold a scholarship this does not automatically carry over into Year 12 and you must reapply.

You can still apply to take an AS level in Mathematics and/or Computer Science without applying to be a Mathematics and Computing Scholar. The scholarship scheme is an **additional** option for students.

How do I apply?

Fill out the scholarship section on your online application. You will then be invited by the relevant department for an interview. You will need to demonstrate your aptitude, enthusiasm and passion for your chosen subject through a piece of pre-prepared work that you should bring along to discuss with the interview panel. For Computing this could be an ICT task that you have prepared independently, Maths scholars will sit a short test. Further details about the interview procedure will be sent to you with your interview invitation.
